This is the first title in this new series, which is aimed principally at secondary PGCE and BAEd students and school- and HEI-based tutors. Each book provides a digest of the central issues around a particular topic or issues, grounded in or supported by examples of good practice, with suggestions for further reading, study and investigation. The books are not intended as 'how to' books, but rather as books which will help students and teachers to

explore and understand critical theoretical issues in ways that are challenging, that invite critical reappraisals of taken-for-granted practices and perceptions, and that provide appropriate links between theory and practice. Issues related to equal opportunities and special needs are included in each separate volume. There are boxes of questions, 'think abouts', further reading, and bulleted summary lists for the reader. This book is written specifically for teachers-in-training which will clarify the 'big picture' of monitoring and assessment and makes the crucial distinctions in this large (and still taken-for-granted) field. The authors have written widely on assessment matters and have also worked in various capacities for the QCA (and its former manifestations). They are also engaged in initial teacher education and so know the level and market extremely well. useful for UPSC, IAS, PCS, Civil Services, related Govt Recruitment Exams Thousands of students write the GATE Paper annually. This book describes a novel, cross-linguistic approach to machine translation that solves certain classes of syntactic and lexical divergences by means of a lexical conceptual structure that can be composed and decomposed in language-specific ways. This approach allows the translator to operate uniformly across many languages, while still accounting for knowledge that is specific to each language. The translation model can be used to map a source-language sentence to a target-language sentence in a principled fashion. It is built on the basis of a parametric approach, making it easy to change from one language to another (by setting syntactic switches for each language and providing lexical descriptions for each language) without having to write a whole new processor for each language. Dorr's approach advances the field of machine translation in a number of important ways: it provides a uniform processor in which the same syntactic and lexical-semantic processing modules are used for each language; it is interlingual, able to derive an underlying language-independent form of the source language that allows any of the three target languages - Spanish, English, or German - to be produced from this form; and it describes a systematic mapping between the lexical-semantic level and the syntactic level that allows the appropriate target-language words to be selected and realized, despite the potential for syntactic and lexical divergences. Bonnie Jean Dorr is Assistant Professor in the Computer Science Department at the University of Maryland. SGN. M.A.K. Halliday (1925–2018) was the founder of Systemic Functional Linguistics (SFL) and, undoubtedly, one of the most influential linguists of his time, credited with changing the way that language and linguistics have been taught. SFL, as an applicable theory that approaches language as social semiotic, is the study of the relationship between language and its functions in social settings. Moreover, SFL conceives of language as a resource for making meaning and organizes language systemically as a huge network of interrelated choices of meaning. This book is an introduction to the life and seminal works of Halliday. Targeting both SFL and non-SFL scholars, this book introduces Halliday's life and work in simple terms, expounds his theoretical conceptions, illustrates how his theories have been applied to various areas of linguistics and offers additional readings for researchers who want to explore this area further. Divided into six sections covering Hallidayan connections, theory and architecture of language, Hallidayan conceptions of language, systems and the modes of meaning, and applications of SFL, this accessible introduction is a key resource for researchers and students within the fields of linguistics and applied linguistics. 2022-23 TGT/PGT/LT Grade Commerce Chapter-wise Solved Papers
